Nagpur, Maharashtra | +91-9284388702 | sairitiknaidu7@gmail.com | [linkedin.com/in/sairitiknaidu](https://www.linkedin.com/in/sairitiknaidu) | github.com/Sairitik008 | sairitik-portfolio.netlify.app

PROFESSIONAL SUMMARY

Backend-focused full-stack developer with 1.5 years of hands-on experience building production-grade REST APIs, microservices, and mobile applications across diverse industry verticals. Adept at designing scalable Node.js backends, integrating third-party services, and delivering clean, maintainable code within agile teams. Complemented by 2.5 years of technical training experience that sharpened problem-solving communication and the ability to articulate complex engineering concepts. Seeking to leverage a strong foundation in distributed systems thinking, cloud-native tools (AWS EC2/S3), and full-stack development to contribute meaningfully as an SDE I at Amazon.

TECHNICAL SKILLS

Languages: JavaScript (Node.js), Python, PHP, SQL, Java (Basic)

Frontend: React.js, React Native, HTML5, CSS3

Backend & APIs: Node.js, Express.js, REST API Design & Integration, Microservices Architecture

Databases: MongoDB, MySQL

Cloud & DevOps: AWS EC2, AWS S3, Git, GitHub, Basic CI/CD concepts, Docker (Theoretical)

Tools & Analytics: Power BI, Payment Gateway Integration, SEO Fundamentals, Android Development

Concepts: OOP, Data Structures, Algorithms, System Design Fundamentals, Distributed Systems (Learning), ML/AI Exposure

PROFESSIONAL EXPERIENCE

Integration Developer — Cluematrix Technologies Pvt. Ltd., Nagpur

Nov 2024 – Mar 2026 | Full-Time (1.5 Years)

- Architected and deployed RESTful API integrations for an EdTech platform, enabling seamless third-party service communication and reducing manual data sync effort significantly.
- Built the Node.js backend for Solarpix, a solar energy management platform, implementing modular service layers that supported real-time data reporting and billing workflows.
- Developed the MERN-stack admin panel and React Native mobile app for Turo (gym fitness platform), ensuring consistent API contracts between mobile clients and server-side logic.
- Delivered a full-featured food delivery application (Sauji) end-to-end using the MERN stack, covering order management APIs, user authentication, and real-time status tracking.
- Integrated government form workflows (Namuna 8/9, Magani forms, bill generation) into the Grampanchayat platform using PHP and MySQL, handling structured data validation and PDF export.
- Contributed to the Wadhuwar matrimony platform — a dual-layer system comprising a PHP REST backend and Android app — handling user profile matching logic and secure media uploads.
- Collaborated with cross-functional teams including UI designers, mobile developers, and project managers across all projects, participating in architecture discussions and code reviews.

Technical Trainer — Disha Computer, Sadar, Nagpur

Jun 2021 – Dec 2023 | Part-Time (2.5 Years)

- Designed and delivered structured curricula for Python, Java, Full-Stack Web Development, MERN Stack, and Data Analytics to engineering students and mid-career professionals.
- Conducted one-on-one coaching sessions focused on DSA problem-solving, interview preparation, and hands-on project development, helping trainees break into technical roles.
- Built reusable coding exercises and project templates that deepened my own understanding of OOP principles, algorithm design, and clean code practices.

KEY PROJECTS

Sales Forecasting Dashboard | Python, Power BI

- Built a real-time retail analytics dashboard following Deloitte reporting standards; integrated Python ETL scripts with Power BI visuals for dynamic sales trend analysis.

Retailer Electronics Marketplace | MERN Stack, SEO

- Developed a full-stack B2C e-commerce platform with product catalogue management, user authentication, and on-page SEO optimisation for organic search visibility.

Digital Visiting Card Platform | MERN Stack

- Created a dynamic digital visiting card generator for franchise businesses, supporting custom branding, QR code generation, and shareable URL deployment.

Mehendi Booking Application | React Native, Payment Gateway

- Built a cross-platform mobile booking app with calendar scheduling, artist profile management, and Razorpay payment integration for end-to-end booking flow.

Repositories & Live Demos: github.com/Sairitik008 | Portfolio: sairitik-portfolio.netlify.app

EDUCATION

Master of Computer Applications (MCA) — RTM Nagpur University | 2022 – 2024 | CGPA: 8.7 / 10

Bachelor of Computer & Commerce Application (BCCA) — Nagpur University | 2019 – 2022 | CGPA: 8.4 / 10

CERTIFICATIONS

- Postman API fundamentals Student Expert
- FreeCodeCamp : API /Microservices
- FreeCodeCamp : Javascript and DSA
- AWS Skill Builder Certification

STRENGTHS & GROWTH AREAS

Strengths:

- End-to-end ownership mindset — comfortable taking a feature from requirement to deployment independently.
- Cross-domain adaptability — delivered projects across EdTech, FinTech, GovTech, and consumer apps within a single role.
- Clarity in technical communication — refined through years of teaching complex concepts to diverse learners.

Growth Areas:

- Actively strengthening DSA problem-solving (LeetCode Medium/Hard) and system design fundamentals to meet SDE I expectations at scale.
- Deepening knowledge of distributed systems, containerisation (Docker/Kubernetes), and advanced cloud architecture patterns.

DECLARATION

I hereby declare that the information provided above is accurate and complete to the best of my knowledge. I take full responsibility for its authenticity.
